The Winfield Nurseries' Trees of Quality

U.S. Department of Agriculture
Washington, D. C.

1910

Mersereau Blackberry from Breeding Patch

WHAT OTHERS SAY ABOUT THEM

O succeed, where others said we would fail, gives us not a little pride in saying, our customers have appreciated "Trees of Quality" and gladly paid us the price that would enable us to furnish them. Their own letters tell the story better than we can.

Twelve years ago when we started the improvement methods in Horticulture in a small way with a 10x12 ft. board packing shed, some old tree growers said: No use, people will buy the cheapest. We now announce they were wrong. The people want the best.

Why buy thoroughbred stock to butcher in three years, but buy trees to grow for thirty years which are grown by tree growers with a view to cheapness alone and who know nothing about the pedigree or fruitfulness of their stock?

First: We choose soil and climate conditions that will give our stock vitality, thereby good root systems, hardness and a tree of longevity. This accounts for our branch plants. All stock can not be grown on one soil any better than all live stock could be grown on one food.

Second: We market only the best. Culls are weaklings, we prefer to burn and maintain our reputation for quality.

Third: We use the best brick storage and packing buildings for care in preserving all vitality in our stock regardless of expense. Our packing in paper lined boxes with non-heating packing material insures perfect condition of stock on arrival regardless of distance. In fact we so guarantee it to our customers.

Fourth: The pedigree of the scions and buds used by us in propagation are as well known to us as is the blood of any individual animal to any fancy live stock breeder.

Fifth: The spraying of stock in growing stages and fumigation before shipment gives us no fear whatever in shipping to any state or undergoing the most rigid inspection.

Sixth: No dealers or unreliable concerns are allowed to use either our name or our stock. You can procure it only direct from us or our regular salesmen. Honesty and a firm determination to stand at the head in producing "Trees of Quality" is the reason for the marvelous growth of our business.

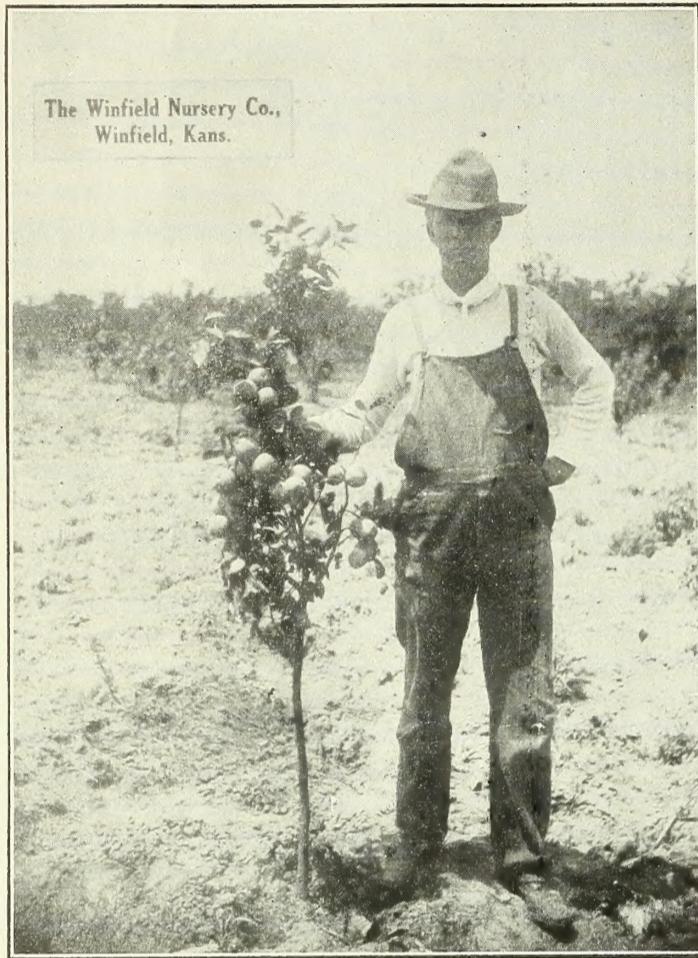

Seventh: Let us give you a practical demonstration by a shipment of "Trees of Quality" but don't waste time by asking our stock at the same prices of inferior stock. Our prices are for "Trees of Quality," regulated by cost of production. If you want the best we want your trade.

Yours truly,

THE WINFIELD NURSERY CO., Winfield, Kansas.

Winfied Nursery Trees Bred to Bear

Other Leading Horticulturists Agree With Us

Winfield Nursery One Year Budded Apple, one year after transplanting. Yellow Transparent. Orchard of A. B. Hemphill, Cement, Oklahoma.

COMMERCIAL GROWER

BRITISH COLUMBIA.

"What you say is quite true about some trees being much better than others of the same kind."

F. E. E. DEHART.

CHAIRMAN EXHIBIT COMMITTEE.

"Yes we took a large number of premiums at the National Apple show, and I believe that we produce some of the finest apples grown anywhere. I am familiar with the conditions that you speak of, and have often observed the difference in the same varieties under same conditions. There is undoubtedly just as much room to improve fruit by careful selection as there is to improve stock of any kind by breeding from the best."

O. A. HOAG.

NORTH CAROLINA DEPARTMENT OF AGRICULTURE.

"I agree with you, there is a good deal in the individuality of plants and that certain individuals of a variety will often produce finer fruit than other individual specimens of the same variety growing right along side of them. I think you are doing good work in this line, and if I can be of any assistance to you I will be glad to help you in any way possible."

W. N. HUTT, State Horticulturist.

YAKIMA VALLEY, WASHINGTON.

"Yes, it is true, that certain trees produce finer fruit than others. Whether from soil conditions or the breeding of the trees, or some other cause, I do not know. I agree with you that it would certainly be safer to use scions from the best individual trees."

H. M. GILBERT.

The Winfield Nursery Apple Tree, Cooper's Early White. Two years after planting. Orchard of I. J. Wagoner, Cement, Okla.

Prize Winner of Washington State

"I have read your descriptive catalogue and think your plan of using nothing but the best is the correct thing. I won six awards on eight entries at the Apple Show."

C. ATKINSON.

State of Washington

"We know where our best, finest bearing trees are, and can assure you that you get just what we say they are. We won the Silver Cup on Most First Prizes and also Silver Cup on Greatest Total Score on all Prizes at the great Apple Show, so we know our own fruit."

WRIGHT BROS.

Large Commercial Grower

"One who is in the orchard all the season is sure to notice that some trees bear better apples than others and I will gladly help you out."

J. O. TAGGARD.

Growers and Packers of High Grade Fruit

"I certainly believe in breeding up trees by selection."

W. P. CASH.

Commercial Fruit Grower

"As you said in your letter there are individual trees of the same variety that are far better than the others. Our prize apples were picked from them."

TEDFORD BROS.

Caddo County, Oklahoma, Jan. 23, 1909.

The Winfield Nursery Co.

Gentlemen:--The trees I ordered from you arrived O. K. Am more than pleased with them, as they are even better than represented and were in good condition when received. I think your way of packing them for shipment is fine. Assuring you of any future orders I may want and wishing you success, I am,

Respectfully,

H. K. Dougherty.

#

Ellis County, Oklahoma, Jan. 28, 1909.

The Winfield Nursery Co.

Winfield, Kansas.

Kind Sir:--I have received my bill of trees all O. K. and like the appearance of them fine. Have not put them out in my orchard yet and will not until spring. I would like to have a copy of your catalogue. I like your way of packing better than any I ever saw. I remain,

Yours truly,

John H. Vignal.

#

Caddo County, Jan. 20, 1909.

The Winfield Nursery Co.

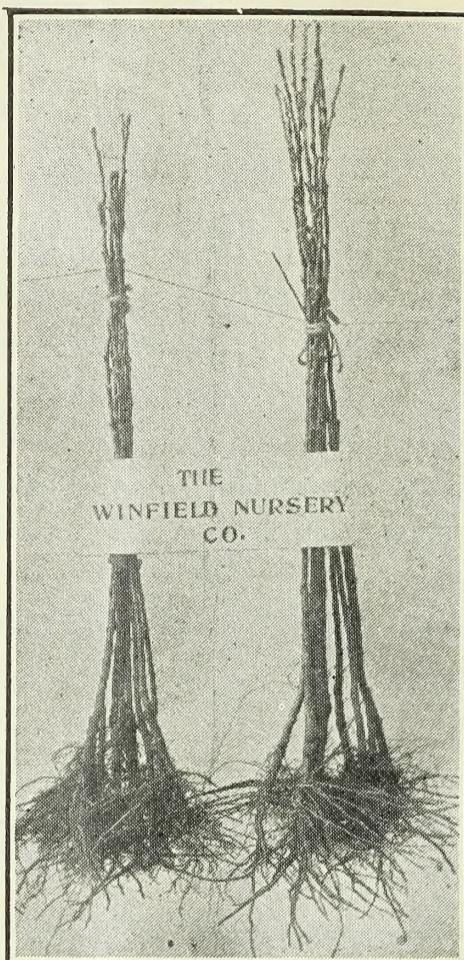

Winfield, Kansas.

Dear Sir:--In reply to letter I will say that I am well pleased with the fruit trees. They are the best I ever bought. The other trees I bought do not compare with yours in any respect; they look like bum junk when compared with yours. In fact your fruit trees are fine as silk. I am well pleased with the order and remain, Yours truly,

O. E. Smith.

1 year Budded Mammoth Black Twig Apple, grown by The Winfield Nursery Co. in Wellington Branch Plant.

One year Grafted Apple from block of 100,000 dug and sold spring of 1909 to commercial planters. This size tree gaining much favor with large planters. Recommended by *Western Fruit Grower* after a trip last year through Western Fruit belt.

ROY M. FELTON, CASHIER

Hydro, Oklahoma

The Winfield Nursery Co.,
Winfield, Kans.

Gentlemen,-

Your company delivered \$6000.00 worth of Nursery stock here about Nov. 20th, 1908. The stock arrived in excellent shape. Every order, of any size, was packed separate in a box, and when unpacked was in just as good condition as if it had just been dug up out of the soil.

I have talked personally to at least three-fourth of the people that purchased this stock, and every one that I talked to said it was the best stock, and packed in the best shape, of any nursery stock they had seen in Oklahoma.

Very respectfully yours,

Roy M. Felton
Cashier.

Extract from letter from Mr. Felton under date of June 5, '09:

"They all report trees as doing fine, about 95% growing nicely."

Note—This after a four weeks' drouth and unfavorable spring for transplanting trees.

#

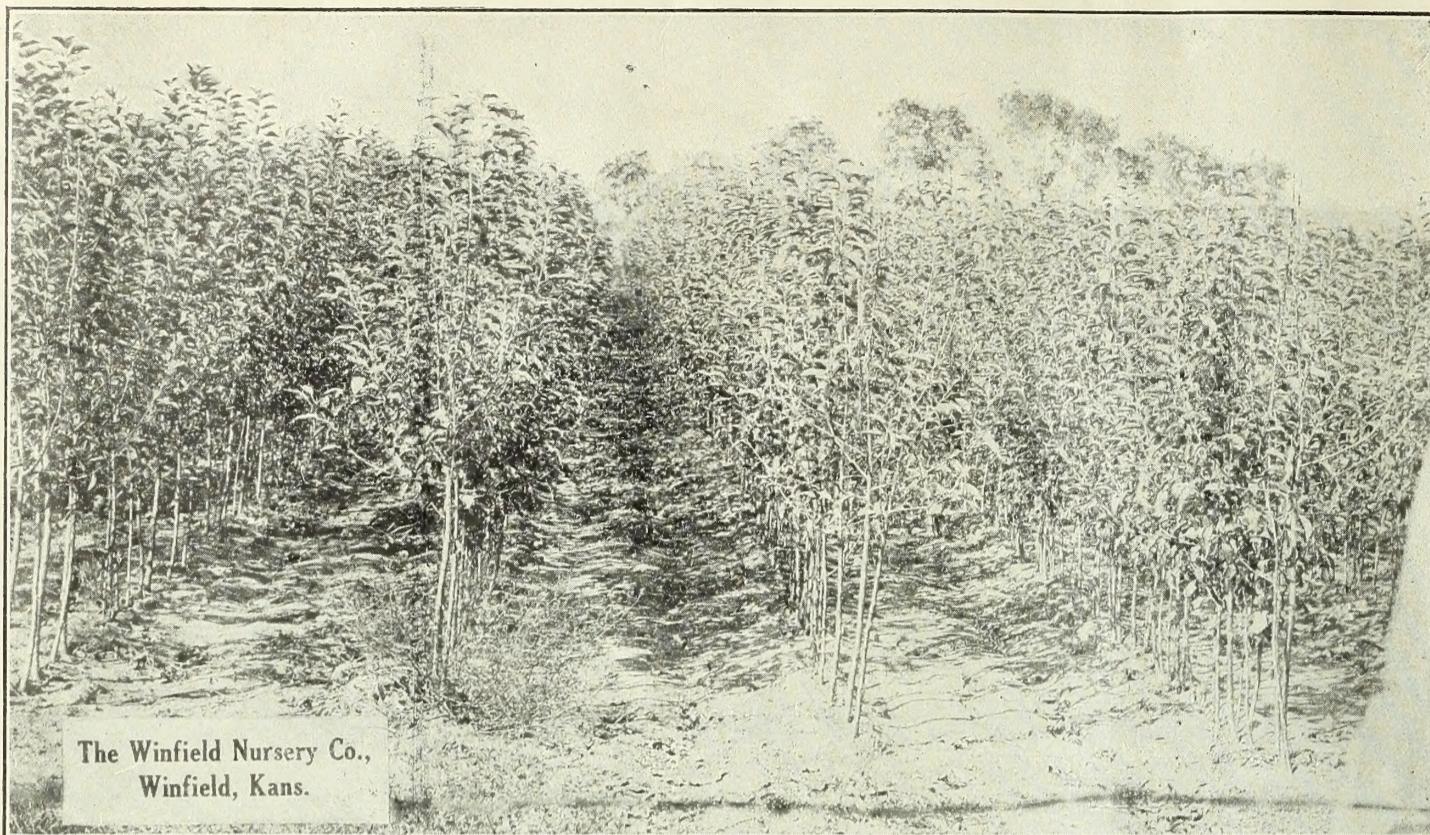

Caddo County, Okla., Feb. 1, 1909.

Dear Sir:

We got your letter and you ask us if we got a catalogue. No and we would like to have one and we are very glad that we got the trees.

Mr, Wesley, Galloawy,
Artesia, N.M.

Dear Sir:-

We would #be glad to have you call on us when you are in town as we will be in the market for a few cherries trees and we want to buy them from the Winfield Nursery Co as we have delt with them and have found them to be a reliable firm.

Will say that the two year old trees that we have received from them was as fine a trees as we ever saw on the market and was received in fine shape and made a fine growth now if we ~~#####~~ get those cherries we want them shiped with our order of 3400 apples that we bought to be delive red this spring.

Hoping to see you in town soon,

YOURS TRULY.

#

Caddo County, Oklahoma.

The Winfield Nursery Co.

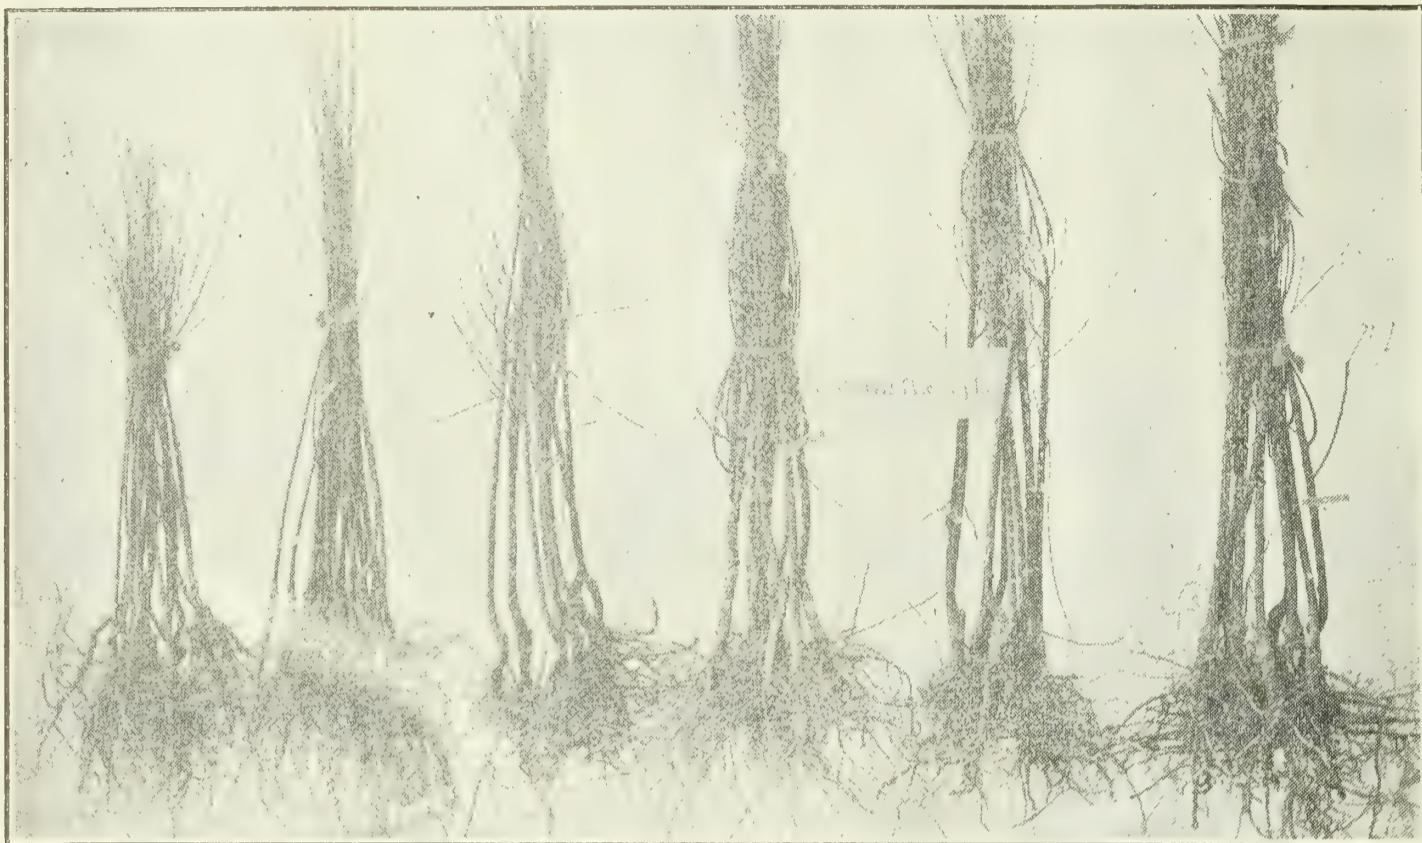

Dear Sir:--In regard to the nursery stock sent me, I wish to say that the trees were fine and in good shape, in fact were the best I ever saw. Everyone seemed to be satisfied with their goods. I went out with Mr. Winn several days and helped him to sell. I shall endeavor to help to make a success of it. Of course the growers will have to help to be successful.

Yours respectfully,

J. U. Buckhardt

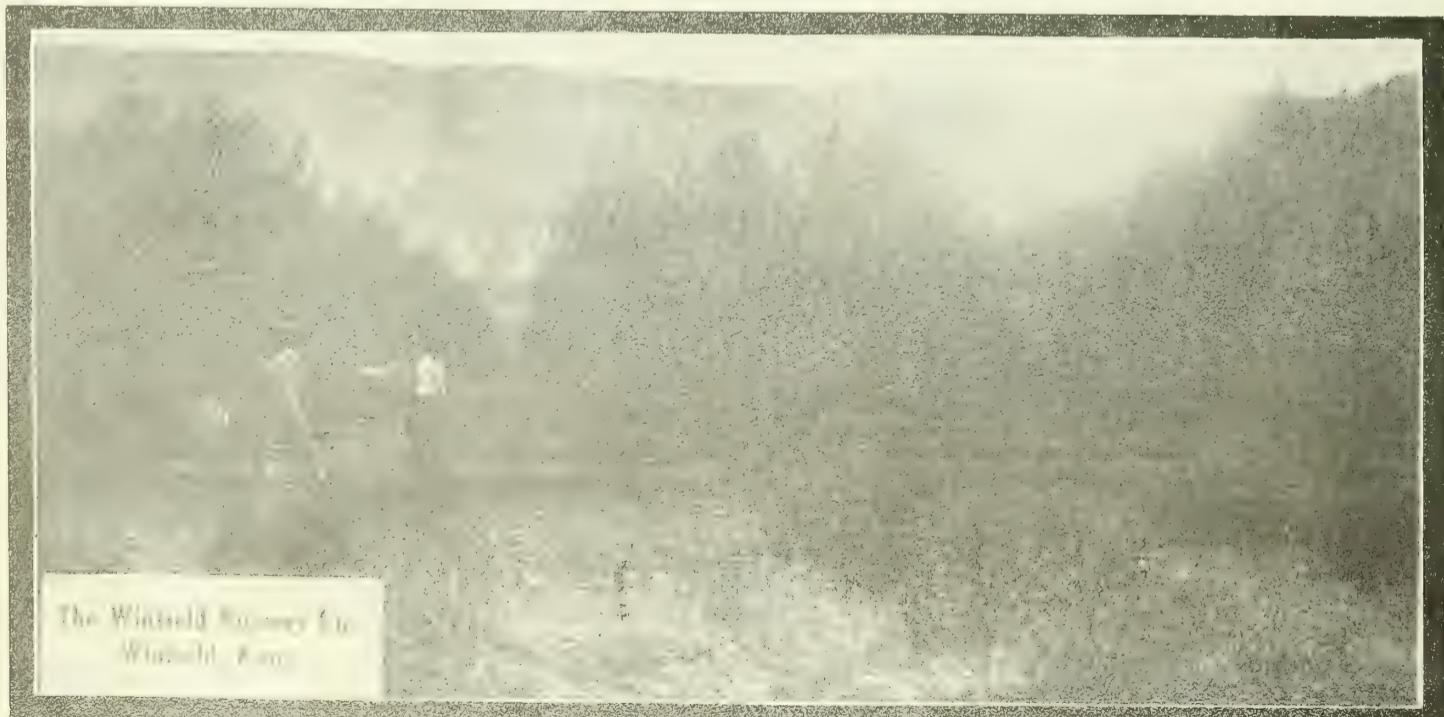

The Winfield Nursery Peach Trees

As Graded for Shipment

\$2,000 Order at Green River, Utah

My stock was simply grand. Only lost seven peach trees out of 7,000, and five apple out of 2,000 trees. Your stock was far ahead of anything shipped into this valley. J. H. BRISCOE.

Two Year Plum grown in Winfield Nursery
Branch Plant at Wellington, Kansas.

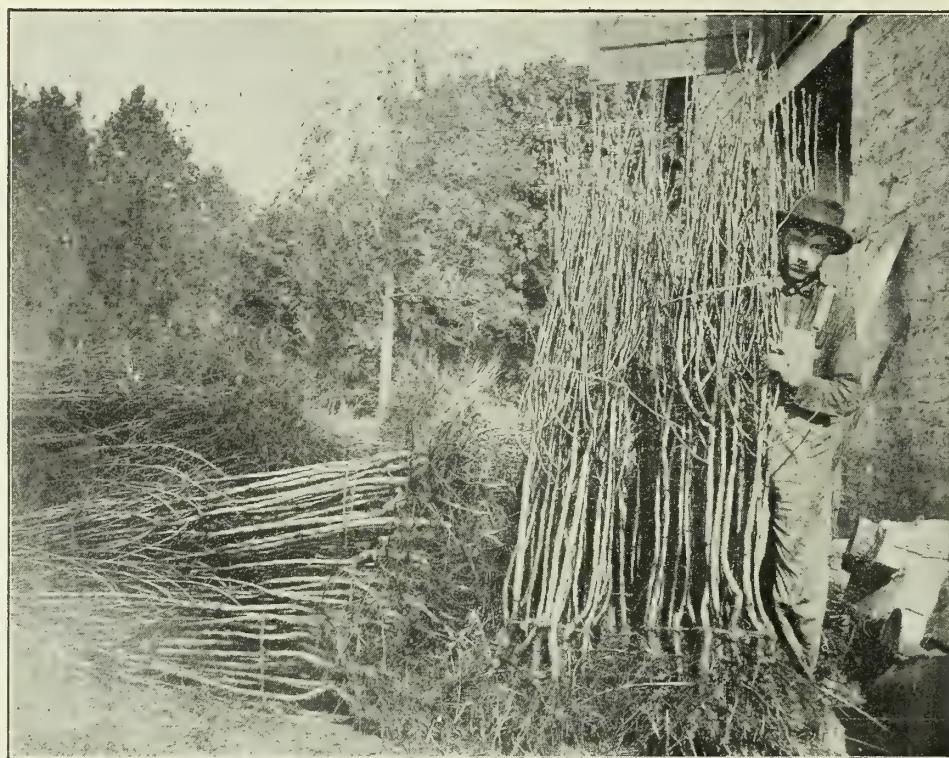

Caddo County, Jan 21, 1909.

The Winfield Nursery Co.,
Winfield, Kansas.

Gentlemen:—

In reply to yours received today wishing my opinion in regard to trees received last fall; I will say they are as fine as I ever saw and have the best root system I ever saw on that aged trees. Of the 324 trees I only saw two that were damaged in the least and they were very light. Having made Horticulture a study for the last fifteen years, I feel competent to judge and will deem it a pleasure to recommend your firm to anyone needing nursery stock.

Yours respectfully,
G. W. BARTGIS.

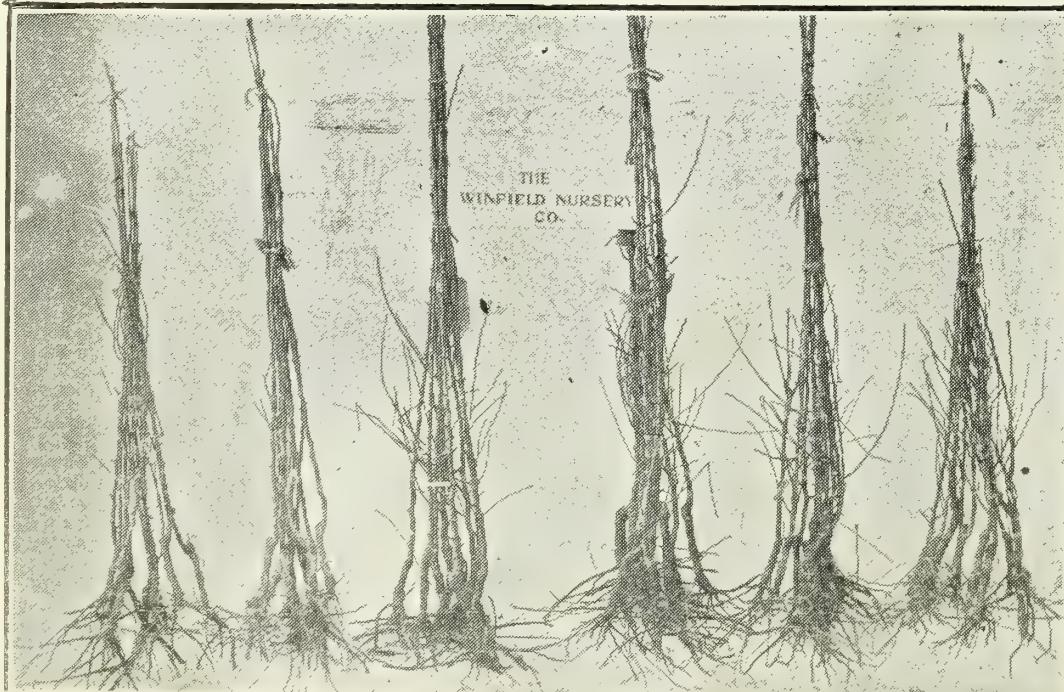

Two Year Keiffer Pear Grown in Winfield Nursery Home Plant

Comanche, Okla.,
Feb. 1, 1909.

To The Winfield Nursery Co.

This is to certify that I have been planting trees and berries from The Winfield Nursery for three years. I now at this present time have eleven hundred trees from their nursery and I couldn't be better pleased. All of their goods are strictly first-class. They have done an extensive business here and I think they will still continue to do their part here. I am,

Respectfully,
W. V. SHOOK.

One Year Bartlett and Beurre d'Anjon Pears. Largest size 5 to 6 ft. high.

Tillman County, Jan. 26, 1909.

Winfield Nursery Co.

Sirs:—

I received your letter asking me if your trees were as I expected them. They are a nice lot of trees, they are just as fine as I ever got and I have got from two different nurseries. They sure was packed well and was in fine shape when I got them. Hoping they will all live and grow alright, I beg to remain.

As ever,

Gentlemen.-

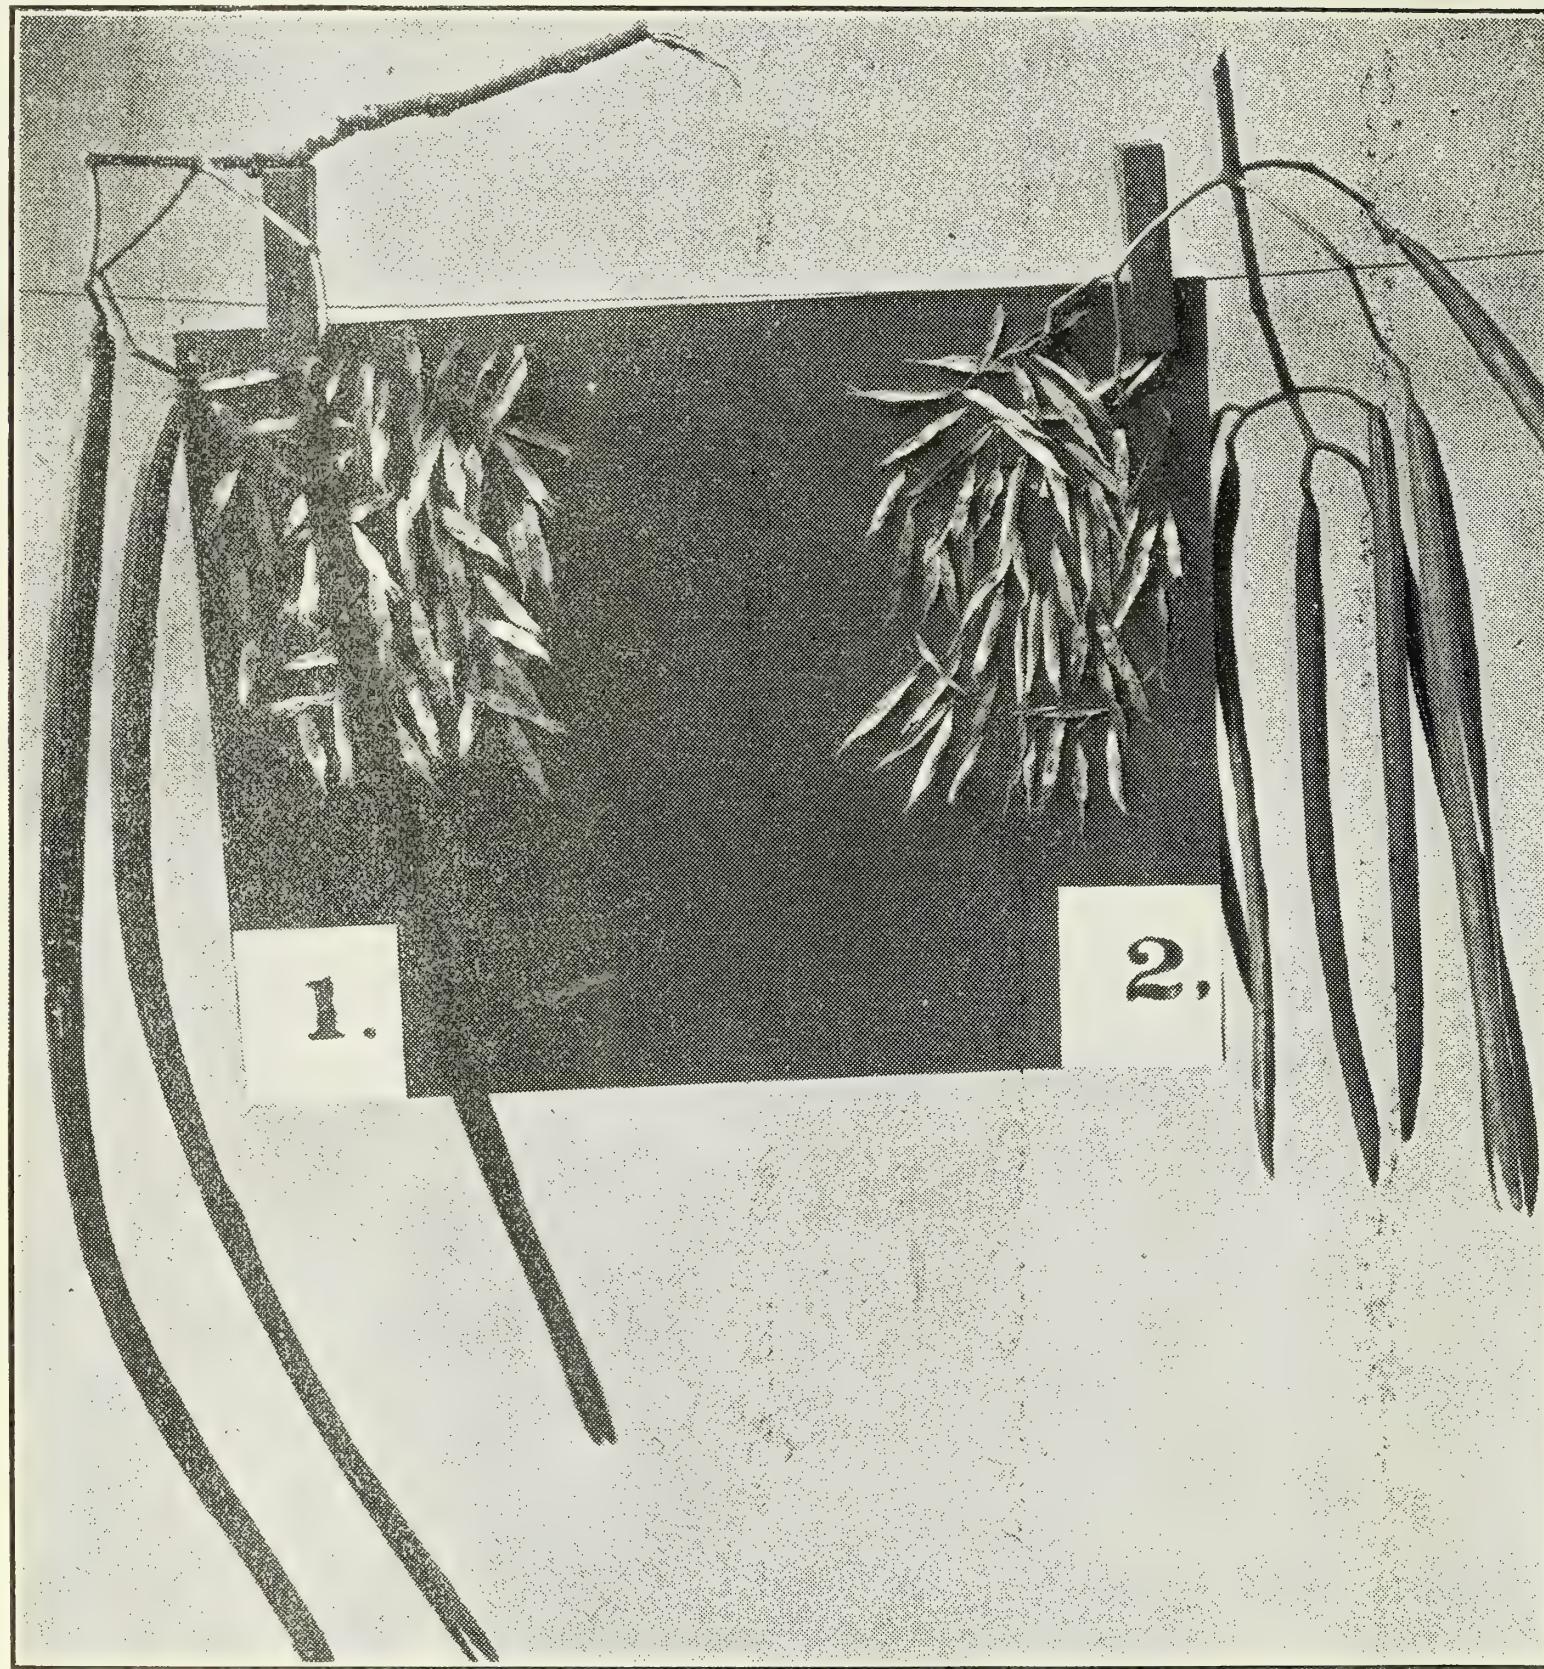

In answer to your inquiry in regard to the quality of the trees received by me from you will say that they are a good lot and that the packing was well done and that I appreciate the service given.

Think that all business men and farmers will be pleased with your way of preparing and growing trees and that your system will be a help to all parties where your stock is sold.

W. A. George of Caldwell, Idaho, during season of 1907, sold \$1,900.00 (net) worth of Apples from 120 Mammoth Black Twig trees, eleven years old.

Ten Million Genuine Speciosa Catalpa

Largest Growers in the World of this Line

No. 1—Genuine Speciosa Catalpa Seed, showing pod, three in a cluster. **Very Valuable Timber.**

No. 2—Bignonioides Catalpa, seed and pod, or common Catalpa, scattered over the country. A worthless tree.

Note what the United States Department of Agriculture says about
Winfield Speciosa Catalpa

THE WINFIELD NURSERY COMPANY, WINFIELD, KANSAS

June 10, 1909.

The Winfield Nursery Co.

Winfield, Kansas.

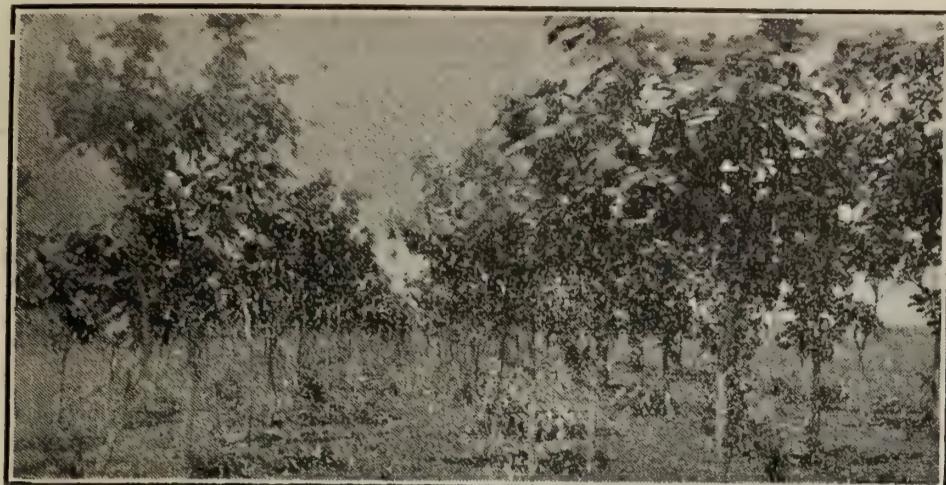

Three years ago I purchased from you 1200 Speciosa Catalpa trees. I set them out the 20th of May the same year, (1906.) There are now in my grove trees that are five inches through.

My farm lays two miles north and seven miles west of Frederick, Okla.; so that any one who is in doubt of these facts can come and investigate for themselves.

The growth is wonderful and its a money maker on short notice. I just ordered 1200 more from your man, Moncrief.

Respectfully,

J. E. SMITH,
R. F. D. No. 7, Frederick, Okla.

Three Year Old Grove of J. E. Smith

From the Kansas State Agricultural College, Bulletin No. 108, Mr. Yaggy writes as follows:

"In reference to the producing value of my plantation, probably the greatest returns, for the present, at least, would be to cut the entire field off and sell the posts. There are now 2,000 trees to the acre, and the trees will average two posts apiece, making about 4,000 posts to the acre, that can be sold at an average of ten cents apiece. The stay posts and fire wood will about pay for the marketing, so that, with careful management, \$400 per acre can be realized at present by taking off everything. On this basis, the plantation would yield an income of \$50 per acre per year. I expect to treat most of my plantations in the above manner, as the returns will be quicker and larger than by growing large trees.—Page 116.

THE YAGGY FOREST.—“The oldest plantation, of 120 acres, was set in 1890. Eighty acres were planted in 1891 and 240 acres in 1892. The latest plantation was set out in 1895, and the land in trees amounts to about 500 acres at the present time.—Page 137.

COST AND PROFITS.—“Careful estimates, based on the Yaggy forest, give total cost of ten years as \$51,70; gross value of product in growing and marketing timber on one acre for ten years \$267.15; net profit, less six per cent compound interest on expenditures, \$197.55 per acre; net annual profit for first ten years \$19.75; owner's estimate of present gross value of product (three years later than above valuation) \$400 per acre; annual income of plantation at present, as estimated by owner, \$50 per acre.”—Page 141.

We recommend for planting any of the following plants:

4 feet by 7 inches, 1555 trees per acre					
4	"	8	"	1360	"
5	"	7	"	1244	"
5	"	8	"	1080	"
6	"	6	"	1210	"
6	"	7	"	1038	"

UNITED STATES DEPARTMENT OF AGRICULTURE
FOREST SERVICE
WASHINGTON

D
OFFICE OF THE FORESTER
DENDROLOGY

February 6, 1909.

The Winfield Nursery Company,

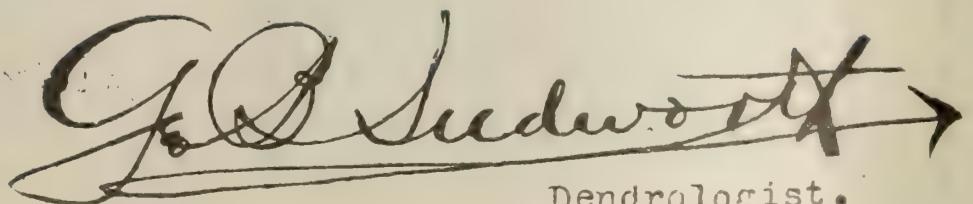

Winfield, Kansas.

Dear Sirs:-

Your communication of January 27 has come to this office, together with the sample of seed sent for identification. The seed is genuine Hardy Catalpa, *Catalpa speciosa* and of the most typical form.

I shall be very glad to identify catalpa and other tree seeds, whenever you may desire to send them. The Forest Service is particularly anxious to be as helpful as possible to tree planters in enabling them to get tree seeds true to name. We find that both seed dealers and tree planters are having much difficulty in getting genuine Hardy Catalpa seed. The market supply, unknown to dealers and frequently to collectors, is very likely to be a mixture of from two to three different species of catalpa seed. As a help to the trade and tree planters, an illustrated publication is being prepared, and I hope it will be of assistance in helping users of catalpa seeds to distinguish the different species and varieties.

Very truly

G. D. Sudworth

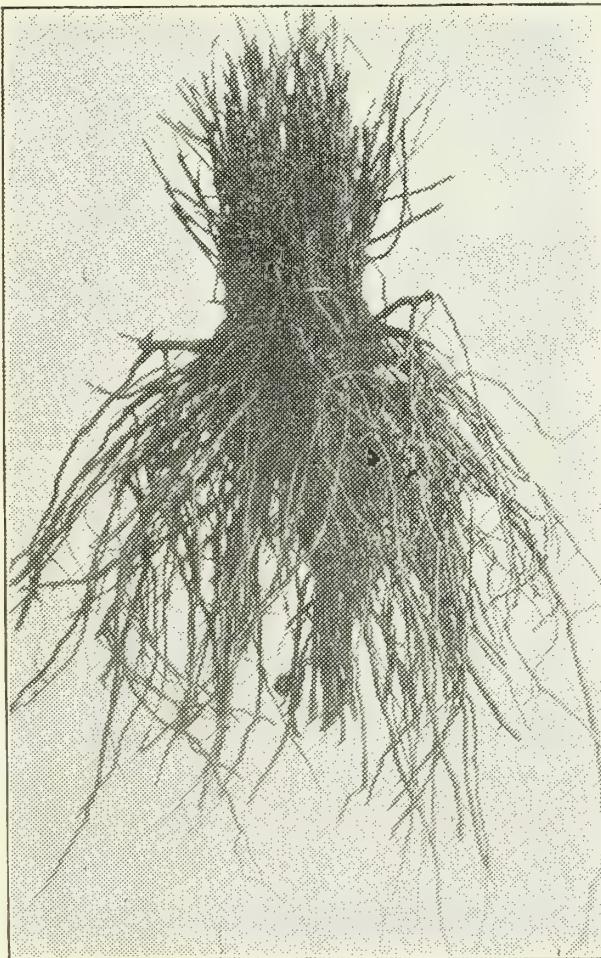

Dendrologist.

Winfield Nursery Propagated Blackberry Produce Enormous Crops Quick

Winfield Nursery Propagated Blackberry Plants producing crop of Fruit first year after planting.

—J. C. BROWN, Caddo Co., Okla.

Bunch of 25 Plants Winfield Nursery
Propagated Blackberry

Cement, Okla., Nov. 19/06.
Winfield Nursery Co.,
Winfield, Kans.

Dear Sirs:-

In 1906 I received and planted 5000 propagated blackberries from you. I got a perfect stand. I planted in rows 7 ft. apart and 3 ft. in the row and a big percent of the roots would lap in the row. In the spring of 1907 I sold about 1500 gallons at an average price of about 25c. They are in excellent condition for a big crop in 1908 as the bushes are much larger now than last year. I planted part of the bushes on land underlaid with gypsum, and a half acre will be a complete loss, but the total loss will not exceed 25%. I believe there were bushes which bore as much as two gallons. I can heartily recommend the Early Harvest.

Yours truly,
J. C. BROWN.

In a Few Years from

Speciosa Catalpa

Complete Booklet of twenty-five pages, fully illustrated, "The Hardy Catalpa," will be mailed out for 30 cents in stamps; and we will also send receipt entitling customer to credit of this amount on first order placed for Catalpa.

Byron, Alfalfa County, Oklahoma.
The Winfield Nursery Co.,

Winfield, Kansas.

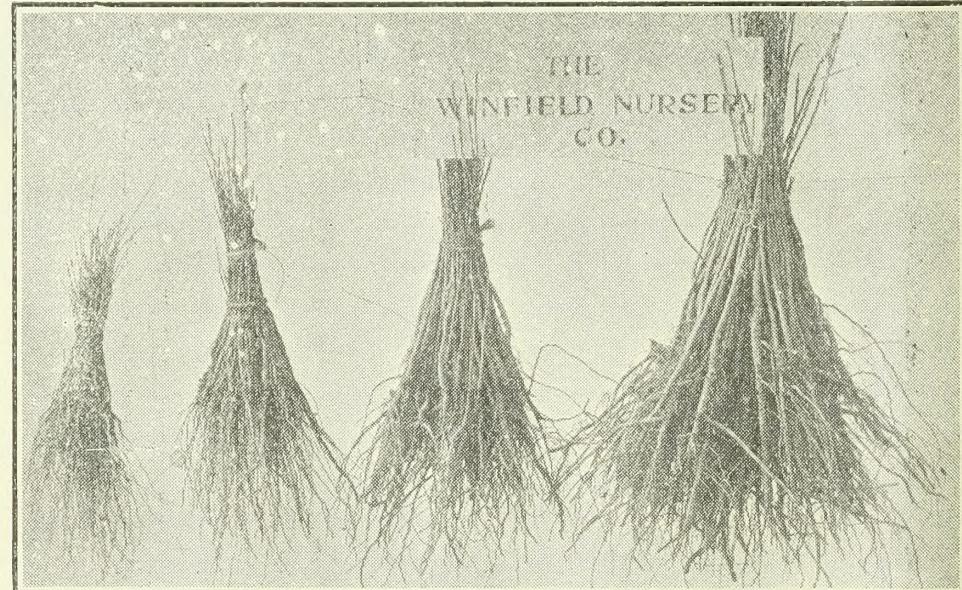

Gentlemen:—Three years ago I bought of your company 5,000 Speciosa Catalpa and planted them on sandy ground. They have grown fine and have made, I think, an average growth of three inches in diameter per tree, a great many of them being as large as 4 1-2 to 5 inches and 18 feet in height.

I did not know how to handle them as they should have been, but since my experience with them I think I could make a better growth. The Speciosa Catalpa is a profitable business and I can recommend the above company as being reliable to get the right kind of Catalpa from.

My intentions are to plant more Catalpa, and wish I had planted more when I first planted these.

Yours,

W. S. KIRKPATRICK.
